ENTERPRISE SYSTEMS

Enterprise systems developed at Blue Streams Solution Ltd include Financial Management systems such as Banking systems, Insurance systems Accounting systems, Auditing systems and shopping systems, School management systems, reporting systems, Clinical systems, Pharmaceutical systems analytical systems etc as requested by the customer. These systems may be represented as web based, desktop and mobile.

WEB DESIGNING & HOSTING

We have a team of web developers, these are specialized in designing websites. We use WordPress, Joomla, PHP with HTML5 bootstrap and any other if specially requested by the customer. We offer web hosting services, maintenance and online marketing. We also offer website optimization to increase traffic on the website.

USSD APPs DEVELOPMENT

These are mobile short codes that are used to access data from another source over a given GSM mobile network. We have developed a number of USSD applications with Airtel Uganda, MTN Uganda and we are yet to extend our services to other areas in the world.

SECURITY SYSTEMS' MANAGEMENT

These involve supply and installation of various security systems in organizations and companies. They include surveillance systems (CCTV cameras), Biometric door locks installations, secret tracking devices among others as desired by the customer.

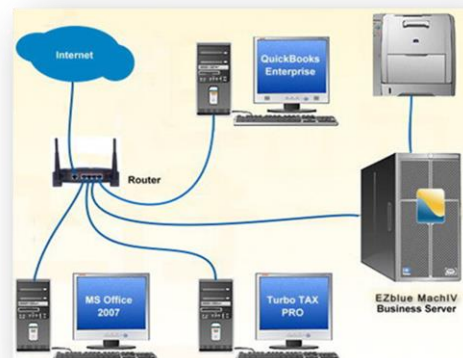

DATABASE MANAGEMENT

Database Management involves designing of any organizational database, maintenance and implementation of the database. We develop database majorly using MySQL and Oracle database languages. We have a highly experienced team in these languages. The choice of the language to use depends on the nature and complexity of the database the client wants.

NETWORKING SOLUTIONS

This involves supply and installation of a network. We provide the fastest internet to various companies and organizations. We also maintain networks. Under this area we provide other networking services to telecom companies.

SERVER ADMINISTRATION

This involves installation of servers such as Linux, Solaris, Windows server and Oracle. We do server maintenance and configurations as needed by our clients.

MOBILE APPs DEVELOPMENT

These include android applications, windows mobile applications, and IOS applications. We have developed a variety of applications that are running within personal companies.

SOFTWARE INSTALLATION & MAINTENANCE

We supply and install software. Most of the software we supply is windows desktop software, antivirus, accounting software among others.

HARDWARE SUPPLY & INSTALLATION

We supply hardware such as computers, laptops and other hardware. We have supplied to individuals, schools, companies, and institutions.
